What is the purpose of a persuasive essay?

Persuasive writing can be used to:

1. convince someone to do something
2. convince someone to believe something
3. convince someone to change their mind
4. convince someone to vote for a candidate
5. convince someone to buy a product
6. convince someone to support a cause

How do I write a persuasive essay?

- Who will be reading your writing?
- Should you be neutral or pro/anti-social?

Checklist:

- The writer must clearly state their position.
- Make it a strong need of your essay.
- Use real examples, statistics, or testimonials to support your position.

The 5-Paragraph Essay Format:

1.	6.
2.	5.
3.	4.
4.	3.
5.	2.
6.	1.

The Great Introduction: How do I hook my reader?

It starts with a "hook" to grab the reader's attention. There are four common strategies to hook your reader:

1. an anecdote or statistic
2. an interesting fact or statistic
3. a quotation
4. a question

What is a thesis?

A thesis is your statement or the end of your introduction that states your position and how you will prove it.

The First Body Paragraph: How do I explain my position?

Offer your reader evidence to help support your thesis body paragraphs.

Types of Support:

What is a quote?	4.	The last sentence of the paragraph should be a strong conclusion.
Why do I need it?	5.	
When do I use it?	6.	
How do I use it?		

Remember your position, restate your thesis, and give the reader something to think about.

1. rest the reader to action
2. end with an anecdote or statistic
3. make a prediction

RELATED INKS

Callifolio Cassis	iroshizuka fire-sare
Robert Oster Purple Rock	MB Oyster Grey
Diamino Vivaldi	iroshizuka fuya-syogun

Handwritten notes and diagrams related to calligraphy and ink.

Calligraphy:

Handwritten text and diagrams illustrating the structure and components of a calligraphic piece, including the use of ink and brush strokes.

Diagram:

Related Inks:

A list of related inks and their characteristics, including Callifolio Cassis, Robert Oster Purple Rock, Diamino Vivaldi, iroshizuka fire-sare, MB Oyster Grey, and iroshizuka fuya-syogun.

Calligraphy Practice:

Handwritten practice lines and diagrams illustrating the technique of writing calligraphic characters, including the use of ink and brush strokes.

Calligraphy Theory:

Handwritten text discussing the theory and practice of calligraphy, including the importance of brush control, ink consistency, and the overall aesthetic of the work.

Calligraphy History:

Handwritten text discussing the history of calligraphy, including its origins in ancient civilizations and its evolution over time.

Calligraphy Tools:

Handwritten text discussing the various tools used in calligraphy, including brushes, inks, and paper, and how they affect the final result.

Calligraphy Exercises:

Handwritten text providing exercises and tips for improving calligraphic skills, such as practicing basic strokes and experimenting with different ink colors and brush types.

Calligraphy Inspiration:

Handwritten text providing inspiration and examples of calligraphic works, including famous calligraphers and their styles.

Calligraphy Business:

Handwritten text discussing the business aspects of calligraphy, including how to market your work, set prices, and find clients.

Calligraphy Community:

Handwritten text discussing the calligraphy community, including local and online groups, and the importance of sharing knowledge and experiences.

Calligraphy Future:

Handwritten text discussing the future of calligraphy, including the impact of technology and the growing interest in traditional arts.

Calligraphy Conclusion:

Handwritten text concluding the manual, expressing a passion for calligraphy and encouraging readers to continue their practice and exploration.

Golden Lion Tamarin Management Committee (1996) Breeder Protocol for Tamarins Golden Lion (Leontopithecus Rosalia Rosalia) Summary The tamarines of Leon are mainly omnivorous. In the past, many captivity animals suffered from deficiencies of protein and vitamin D3 because the diets in captivity were strongly biased in favor of the fruit. However, both zoos and laboratories usually complement these diets, since the real requirements of the species are unknown. Supplementation with vitamin D3 is necessary since the healing can not synthesize this in the absence of sunlight. www.insectworld.com/campbell/pubs.htm
