**2021 WATER QUALITY REPORT  
FOR  
EVANSDALE WATER WORKS**

This report contains important information regarding the water quality in our water system. The source of our water is groundwater. Our water quality testing shows the following results:

CONTAMINANT	MCL - (MCLG)	Compliance		Date	Violation	Source
		Type	Value & (Range)			
Lead (ppb)	AL=15 (0)	90th	0.00 (ND - 1)	2019	No	Corrosion of household plumbing systems; erosion of natural deposits
Copper (ppm)	AL=1.3 (1.3)	90th	0.312 (0.0049 - 0.634)	2019	No	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
<b>950 - DISTRIBUTION SYSTEM</b>						
Chlorine (ppm)	MRDL=4.0 (MRDLG=4.0)	RAA	3.0 (2.6 - 3.4)	12/31/2021	No	Water additive used to control microbes
<b>01 - TREATED WATER FROM WELLS, 1, 3, 4</b>						
Sodium (ppm)	N/A (N/A)	SGL	30.1	01/07/2021	No	Erosion of natural deposits; Added to water during treatment process
<b>02 - FINISHED WATER TAP, #5</b>						
Sodium (ppm)	N/A (N/A)	SGL	18	07/21/2020	No	Erosion of natural deposits; Added to water during treatment process

Note: Contaminants with dates indicate results from the most recent testing done in accordance with regulations.

**DEFINITIONS**

- Maximum Contaminant Level (MCL) – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- Maximum Contaminant Level Goal (MCLG) -- The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- ppb – parts per billion
- ppm -- parts per million
- pCi/L – picocuries per liter
- N/A – Not applicable
- ND -- Not detected
- RAA – Running Annual Average
- Treatment Technique (TT) – A required process intended to reduce the level of a contaminant in drinking water.
- Action Level (AL) – The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
- Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
- SGL – Single Sample Result
- RTCR – Revised Total Coliform Rule
- NTU – Nephelometric Turbidity Units

**GENERAL INFORMATION**

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water posed a health risk. More information about contaminants or potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. EVANSDALE WATER WORKS is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

**SOURCE WATER ASSESSMENT INFORMATION**

This water supply obtains its water from the limestone and dolomite of the Devonian aquifer. The Devonian aquifer was determined to be highly susceptible to contamination because the characteristics of the aquifer and overlying materials provide little protection from contamination at the land surface. The Devonian wells will be highly susceptible to surface contaminants such as leaking underground storage tanks, contaminant spills, and excess fertilizer application. A detailed evaluation of your source water was completed by the Iowa Department of Natural Resources and is available from the Water Operator at 319-233-5524.

This water supply obtains its water from the dolomite and limestone of the Silurian-Devonian aquifer. The Silurian-Devonian aquifer was determined to be highly susceptible to contamination because the characteristics of the aquifer and overlying materials provide little protection from contamination at the land surface. The Silurian-Devonian wells will be highly susceptible to surface contaminants such as leaking underground storage tanks, contaminant spills, and excess fertilizer application. A detailed evaluation of your source water was completed by the Iowa Department of Natural Resources and is available from the Water Operator at 319-233-5524.

**CONTACT INFORMATION**

For questions regarding this information or how you can get involved in decisions regarding the water system, please contact EVANSDALE WATER WORKS at 319-233-5524.

Slideshow are interesting solutions for advertising products. When it comes to standard minimum image sizes, it's possible to distinguish: 500×262 pixels for: Instagram feed Explore tab on Instagram Facebook and Messenger stories 500×889 pixels (vertical) for Instagram stories 254×133 pixels for: Facebook feed In-stream videos Audience Network: native ads, banners, full-screen ads, rewarded videos Instant Articles on Facebook (or 1200×1200 with a link) Facebook Marketplace Search results on Facebook The right column on Facebook Messenger inbox 1200×444 pixels; Page likes (it's also possible to use 2:3 and 1:1 ratios - 1080×1080 pixels) The carousel format allows you to advertise a few images in the form of one advertisement. When it comes to slideshows, it's required: To insert from 3 to 10 images when creating the slideshow yourself To insert from 1 to 10 images when using one of the templates (the number depends on the selected template) To ensure that the slideshow is maximally 15 seconds long Format: Square (1:1) Horizontal (16:9) Vertical (2:3) Due to the fact that users focus their attention on ads only for a short while, it's recommended to keep your videos maximally 15 seconds long. For the time being, it's available exclusively on mobile devices. On the other hand, for Instagram choose: 1:1,91 to 4:5 for Instagram feed Full-screen vertical (9:16) for Instagram stories (1) Increasing brand awareness and conversion rate with Google Ads campaign? If you select video views as the objective of the campaign, then the recommended lengths are: Instagram feed: up to 120 seconds Instagram stories: up to 120 seconds The explore tab on Instagram: up to 240 minutes Facebook stories: up to 120 seconds Audience Network (native, banner, full-screen): 5-120 seconds In-stream videos in Audience Network: 5-120 seconds Rewarded videos in Audience Network: 5-120 seconds Instant Articles on Facebook: up to 240 min In-stream videos on Facebook: 5-120 seconds Messenger stories: up to 15 seconds. 4GB Ratio: vertical (4:5) Format: .mp4, .mov, .gif Sound: added with subtitles (to learn more, go to the section with extra pieces of advice) Length: Recommended: up to 15 seconds - then it can be applied in most placements Facebook: max. Depending on the placement, there are different video requirements. They smoothly combine photos and offer the possibility to insert text elements and logos. It's possible to use videos, images, source: Facebook for Business and slideshows. 3 images. Video length - 15 seconds (graphics will also be displayed at the top of the Instant Experience) Image pixel size Format Placement Additional Information 1080×1080 Square (1:1) Facebook and Instagram feed - 1200×628 Vertical (16:9) Instagram Feed - Canvas (no specific guidelines) Image pixel size Format Placement Additional Information 1200×628 9:16 or 1:1 A thumbnail in the feed Available solely on mobile devices Slideshow Image pixel size Format Placement Additional Information Recommended min. 240 min. After clicking on the ad, users are automatically redirected to an Instant Experience, which is a full-screen experience aiming at engaging users' interest. or .png Weight: max. This is a full-screen environment designed to maximally engage users. However, there's no need to panic - the industry is full of generally recommended dimensions that will certainly help you shorten the list of requirements sent to your graphic designer. When it comes to videos, it's a good idea to enable sounds and subtitles. 240 minutes In-stream: 5-15 seconds Audience Network: 5-120 seconds Instagram stories: max. The feed thumbnail is 1200×628 pixels, however, Facebook hasn't published any specific recommendations concerning the Instant Experience. Unfortunately, the number of requirements provided in the Facebook Ads guide can be overwhelming for advertisers who may have trouble deciding whether the images they prepared are the most optimal choice. Feed: Square (1:1) for images Vertical (4:5) for videos Stories: vertical (9:16) graphics that capture the whole screen Carousel videos: square (1:1) In-stream videos: horizontal rectangle (16:9) Audience Network: vertical rectangle (9:16) The right column on Facebook: rectangle (1, 91:1), alternatively square (1:1) Moreover, Facebook enables downloading aspect ratio templates that help you guarantee that all your images are compliant with the recommendations. Your carousel should comprise at least 2 and maximally 10 images (or videos). In-stream: 5-15 seconds Audience Network: 5-120 seconds Instagram stories: max. You can prepare your own slideshow or take advantage of the ready-made templates. 4GB Sound: added with subtitles (more in the advice section at the end of this article) Format: .mp4, .mov, .gif Length: Recommended: up to 15 seconds as then it can be applied in most placements Facebook: max. Minimum 500 pixels Format: .jpg or .png Ratio: Square (1:1) - for placements like feed or in-stream videos Vertical image (9:16) - it's a full-screen format in stories, applications or websites Horizontal image (1.91:1) - used in the right column on Facebook, search results or Instant Articles Different campaign objectives suit different ad placements. Here, it's possible to employ either static images (and fill the cards with product images) or videos (including slideshows). It enables using videos, images, carousel cards, forms and allows users to browse through products. 120 seconds Rewarded videos: 3-60 seconds When applying this ad format, you can take advantage of a group of elements displayed in the full-screen mode. 15 seconds It's also suggested to provide subtitles (for users who turned off the sound) Facebook's recommendations: Resolution: minimum of 600 pixels File size: max. 1080×1080 and 1280×720 1:1 16:9 (Stories) 2:3 Available for all advertising objectives and placements from 3 to max. Image specs: Size: 1080 x 1080 pixels Ratio: square (1:1) Format: .jpg. One-image ads are the most popular and effective solutions found on Facebook. 30 MB Video specs: At least 600 x 600 pixels (however, the recommended size is 1080×1080) File size: max. It provides users with different recommendations concerning image dimensions and sizes depending on the type of ad and place where it's supposed to be shown. 10 images when creating the slideshow yourself from 1 to 10 images when selecting one of the templates Source: Facebook for Business Let's start with aspect ratios as they're determined by the ad placement. Table of Contents We're perfectly aware of the overwhelming and confusing abundance of guidelines concerning images in Facebook Ads campaigns. In most cases, applying them correctly is enough to ensure that your images will work properly. 120 seconds Rewarded videos: 3-60 seconds. 2, max. That's why (before getting down to more detailed recommendations), we'll provide you with certain instructions usually sent to our clients. When it comes to general guidelines, we can distinguish: The recommended ratio for most placements: 4:5 vertical (for feed, Facebook, Instagram and parts of Audience Network) Full-screen vertical (9:16) for Facebook and Instagram Full-screen horizontal (16:9) for in-stream videos (in some cases also 1:1) The recommended length: max. This results from the fact that a significant part of videos is muted, therefore, your content should be either accompanied by texts or fully understandable without sound. However, it needs to be mentioned that collections work solely on mobile devices. For Facebook ads, you can apply: Ratio: vertical (9:16) - however, make sure that the most important parts of the video are also displayed in 2:3 ratio (Facebook feed on mobile devices) It's advisable to advertise Facebook feed in the form of a square (1:1) carousel or in a form of ads without links: from 16:9 to 1:1. The images are displayed on separate cards and each of them can have its own link that redirects users to different websites. Facebook Ads - Delante's recommendations: Sizes - we suggest using at least four ad sizes: 1080×1080, 1200×1200, 1200×628, 1080×1920 px Supported formats - graphics: .jpg, .png / videos: .mp4, .mov, .gif Text in images - maximally 20% of the image area can be filled with text; to check your proportion of text to image, go to: Graphic elements - logos and important elements shouldn't be placed near edges as they might be cropped Quality - make sure that your images are of top quality Image Pixel Size Format Placement Additional Information 1080×1080 Square (1:1) Most placements (including campaigns driving users to like the site) A minimum format recommended 1200×628 Horizontal image Facebook Instant Articles, the right column on Facebook - 1080×1920 Vertical image Stories (Fb, IG, Msg), Audience Network (banner, native, full screen) - 1200×1200 Square (1:1) Most placements Less popular format, Displayed better on higher resolution monitors Image pixel size Format Placement Additional Information 1080×1080 Square (1:1) Facebook, Audience Network, Messenger, Instagram (feed) Recommended Min. 10 images or videos (suggested length - 15 seconds) 1080×1920 9:16 Instagram Stories Max. In this ad format, it's advisable to use: 1080×1080 pixels images 2 minutes long videos. If you run a Facebook Ads campaign but still aren't sure what size your images should be to ensure that they're displayed correctly, this article is something that may interest you! When it comes to graphics, Facebook loves diversity. 9:16 (rectangle) or 1:1 (square) are the recommended aspect ratios. Sure, why not! See how to obtain an 815% increase in website traffic in 5 months! Find out more See all case studies Video sources on Facebook: up to 240 minutes Obviously you can take advantage of more solutions and various aspect ratios. Try to ensure that your images have: Resolution: highest possible. In today's entry, we'll introduce you not only to the exhaustive list of recommendations provided by the social media platform but also to some quality suggestions from Delante's specialists. We recommend using at least four sizes of images: 1080×1080, 1200×1200, 1200×628, and 1080×1920 pixels of the highest possible quality and low weight.
